+ SIDEWINDER® X4.2

TASK SUPPORT VEHICLE

4.2m Platform Height.

400kg Unit Capacity.

Flashing Safety Light and Alarm.

Safe & Secure Operator Compartment.

No License Required.

TAKE CONTROL.

Introducing the Sidewinder® X4.2– the ultimate solution for businesses looking to enhance safety, productivity, and efficiency in their warehouse, retail, distilleries, and other industrial and commercial operations.

Say goodbye to hazardous ladders, steps, and stools, and eliminate the need for a forklift with work cage and multiple staff members. The Sidewinder® allows for a wide range of elevated tasks to be completed with ease, including order picking, shelf stocking, inventory management, maintenance, and assembly.

Our electric power steering technology enables effortless maneuverability, even in tight spaces, while the functional, dual-hand operating system ensures complete control of the unit. Plus, with dual USB ports, you can easily charge your handheld devices such as tablets, mobiles, and barcode guns, all while working at elevated heights.

The Sidewinder® Task Support Vehicle is the ideal solution for small volume order picking and restocking, significantly reducing labour costs and saving precious time. With its unparalleled versatility and efficiency, the Sidewinder® X4.2 is the ultimate work tool that will prove invaluable in many areas of your operation.

- 400kg Capacity (including operator)

TECHNOLOGY

Super-Fast Charging Times.

Max. Power Capacity.

Zero Maintenance.

Longer Run Times.

Long-Life Cycle.

Partial Charge, Anytime.

TASK x NEXSYS[®] TECHNOLOGY.

The Nexsys[®] battery pack are an alternative to lithium and lead-acid batteries that offer faster charging, longer lifespan, lower total cost of ownership, greater safety, reduced maintenance, better performance in extreme temperatures, and environmental friendliness.

Nexsys[®] batteries have a faster charging time than both lead-acid and lithium batteries because they can handle higher charging rates without damage or reduced lifespan; this makes them ideal for material handling equipment.

They also last up to twice as long as lithium batteries, reducing the need for battery replacements and resulting in lower total cost of ownership over their lifespan.

Nexsys[®] batteries require no maintenance from the operator, reducing safety incidents around battery maintenance. This ultimately means less hassle for operators and reduced maintenance costs over time.

Nexsys[®] batteries are also designed to operate efficiently in extreme temperatures, making them ideal for use in hot and cold environments.

TASK are committed to minimising the environmental impact of manufacturing our walkie stackers, and the use of Nexsys[®] batteries adds to this. Nexsys[®] batteries are safer and more environmentally friendly than lithium batteries. They do not pose any fire or explosion risk, and are 99% recyclable.
